Oak wilt certified staff?	Prescribed burns?	Native seed provider?	Garden/rain garden design?	Narrative summary of services
Water Landscapes LLC	Yes	Yes	Yes	Yes	No	Yes	Yes	Yes	We work to eradicate/control the spreading of invasive terrestrial and aquatic plants. Aquatic plants include submersed invasive species as well as emergent invasive species.
Wildlife & Wetlands Solutions	Yes	Yes	Yes	Yes	No	Yes	No	Yes	Wildlife and Wetlands Solutions is a full-scale habitat restoration and management company, providing a variety of services to improve natural landscapes and native community compositions. We specialize in the chemical, mechanical, and manual control of invasive terrestrial and emergent aquatic species. We carry out a diverse range of management activities including planting, seeding, and wildlife opening creation, tree felling and brushing for aspen and alder regeneration, and natural shoreline restoration. Our professional staff oversee each project from permitting to post-treatment monitoring to ensure all restoration objectives are met with great satisfaction.
Wildtype Ecological Services	Yes	Yes	Yes	Yes	No	No	No	Yes	Wildtype grows trees, shrubs, grasses, wildflowers, and emergent wetland species typical of Michigan woodlands, wetlands and prairies. It is our objective to propagate nursery stock with enough genetic diversity to create self-sustaining populations. Wildtype also provides ecological services for public, commercial and residential projects focusing on restoration and preservation of native landscapes. Some of our services include invasive species management, native plant installation, site assessment and botanical surveys.
